

## **ABSTRACT**

A bolt system for multi-barrel rifles with at least two firing pin pieces. Trigger levers are associated with the firing pin pieces. At least one trigger can rotate about a trigger axis. At least one pivotable pendulum weight is provided for avoiding an unintended firing of a shot. The pendulum weight is arranged on the trigger in such a manner that it can pivot about a pivot axis that is located, viewed in the direction of firing, in front of the trigger axis, and the center of gravity of the pendulum weight is located above the trigger axis.
